Noted From The Transportation Department

With the changes of seasons and also, clothing, we want you to be aware of draw strings on jackets and hoodies and articles hanging off backpacks. Please make sure that students carry all their belongings in a backpack or book bag. This prevents them from dropping articles that could potentially end up under the bus with students chasing them. Tote bags, book bags, jackets, and hoods should be free of any dangling articles, long straps, drawstrings, and key chains that become entangled in the bus doors or railing. Key chains should be removed also, because they have the potential to hit other students in the face as students maneuver through the bus to their seats. Please inspect your Childs clothing and belongings.

Please remember to give your child the appropriate bus note if they are not going to be dropped off at their normal location. Recently we have had to delay buses in order to properly locate the correct destination for your child.

If you changed phone numbers since the start of school, both home, cell, and emergency contact, please update them in the office. These numbers are essential, especially for after school when trying to locate a parent or guardian to get information on their child.

This year we have been experiencing multiple days where we are short bus drivers for our regular runs. This creates more issues than you can imagine. We are always looking for possible candidates to train to become bus drivers and sub drivers. If you might be interested and your daily schedule would allow you to drive a morning run or afternoon run, contact the bus garage at 963-8650 and we can discuss this option.

For our younger riders, please make sure that a responsible person is clearly visible to the driver at the end of the day so that we can assure someone is home for your child.

Nurse's Notes

With the spring season comes the insects.

Ticks are probably going to be prevalent this season. Many ticks carry Lyme Disease.

When going out doors, Wear repellent

Check for ticks daily. Have someone check areas you can't see for ticks.

Shower soon after being outdoors.

Remove ticks as soon as possible. Call your doctor if you get a fever or a rash.

HOW TO REMOVE A TICK:

Use fine tipped tweezers to grasp the tick as close to the skin's surface as possible.

Pull upward with steady, even pressure to remove the tick, Avoid twisting or jerking.

Clean the bite area and your hands with soap and water.

Observe the area for a rash.

DON'T USE NAIL POLISH, PETROLEUM JELLY OR A HOT MATCH TO MAKE THE TICK DETACH

If you are concerned about the tick bite, notify your physician for advice.

If you develop a rash or fever, see your doctor.

Be sure to tell the doctor about your recent tick bite, and when it occurred.

If you are not comfortable removing the tick yourself contact your physician for advice.
